

The following is the text of the Williamstown Proposal Letter of Intent (LOI). Because the LOI is not available electronically at this time, the letter has been reproduced below. The start-up budget of \$163,455., also unavailable electronically, is available from the Division of Mental Health. Please contact Diane Cota at 802-2014 if you are interested in a copy of this.

Sharon Moffat, RN, MSN
Deputy Commissioner
VT Department of Health
Division of Mental Health
P.O. Box 70
Burlington, VT 05402

Dear Deputy Commissioner:

I am writing to inform you of the recent efforts of Clara Martin Center, Howard Center for Human Services, and Washington County Mental Health Services to establish the first of two Community Recovery Residences. As you are aware the CRR model has been agreed upon by the Vermont State Hospital Future Planning Advisory Committee as a first step in modifying the practices in our state to serve those persons who are now inpatient at VSH. The above listed agencies have established a new corporate entity, Collaborative Solutions, Corp. that will be responsible for the day-to-day operation of a CRR in Williamstown, Vermont at the location of the Autumn Harvest Inn on Route 64. As the representative of this effort I am formerly requesting that the Vermont Department of Health accept this letter of intent as the commencement of the Certificate of Authority process that will lead to one of the first new programs to emerge from the efforts of the Futures Committee and its sub-committees.

Sincerely

Paul Dupre
President of CSC Board of Directors
